Hendrick’s RESISTANCE WELDED WEDGE WIRE, also known as PROFILE WIRE or V-WIRE, is manufactured by wrapping wire helically around supports that are resistance welded together. It can be fabricated to a variety of shapes, sizes, and open areas. The result is a very strong product with a smooth surface that is resistant to clogging. This makes wedge wire advantageous for corrosion resistance and ADA compliant applications.

Available in 304L and 316L Stainless Steel.

Available in slot openings 0.005” and up. Standard flatness of 0.125” all planes.

* Not suitable for load bearing applications
Resistance Welded Mounting Options

**EZ Loc Mounting System**
- Recommended spacing between 24” - 36” on center
- Each mounting area includes welded plate between supports and (2) pcs. of EZ Loc

**Hidden Mounting Tab System**
- Recommended spacing between 24” - 36” on center
- Each mounting area includes 10-24 screws, stainless washer and lead anchor

**Surface Block Mounting System**
- Recommended spacing between 24” - 36” on center
- Each mounting area includes 5/16 machine screw and expansion shield

**Hidden Hold-Down Clip System**
- Recommended spacing between 24” - 36” on center
- Each mounting area includes 10-24 screws, vinyl washer and lead anchor
