

FALSE BOTTOM / LAUTER TUN SCREENS FOR BREWING

Hendrick's commercial-grade lauter screens are ideal for use in brewing and distillery applications. Our screens offer a high open area, providing optimal extraction. They can be manufactured as a single unit or as sections for easy installation or removal through service doors and manways.

SCREEN FEATURES

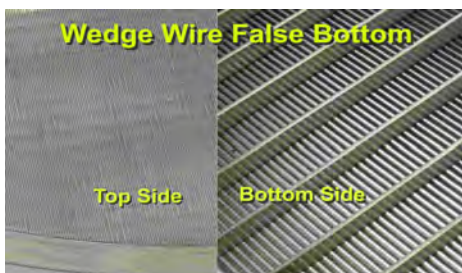

Hendrick offers two manufacturing options for false bottom screens. Both are available in custom sizes and framing options.

WEDGE WIRE

- Excellent separation properties with high resistance to clogging
- V-shape provides optimal open area
- Easy to clean, providing reduced maintenance costs
- Standard slot openings are .028" or .030" (other sizes available)

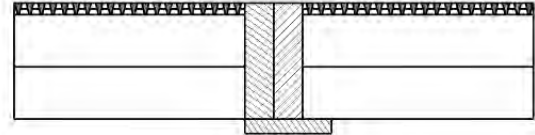

WATER JET PLATE

- Increased flatness
- Reduced weight
- Available in multiple thicknesses
- Custom slot design configurations
- More economical for smaller diameter sizes
